

The 60th Annual
**Carl B. & Florence E. King
Foundation High School Summer
Program in Biomedical Sciences**

Sponsored by the **School of Health Professions**

Applications accepted Nov. 1, 2019 to Jan. 16, 2020

Program Dates June 8 - July 24, 2020

The program introduces interested and qualified young Texans to a research environment and provides firsthand experiences in the varied career opportunities available at MD Anderson Cancer Center in Houston, Texas, the nation's leading cancer research and treatment centers. A total of 10 students will be selected to participate in this seven-week program and will receive a scholarship award to assist with financial responsibilities during the program.

Students selected for the program are given a rare opportunity to participate in a research project in one of the biomedical disciplines under the guidance of a full-time member of the MD Anderson faculty. Emphasis is placed on the importance of the basic principles that form the foundation for scientific investigation.

The laboratory experience is supplemented by seminars presented by faculty on a wide variety of research topics and by activities exclusive to participants of all the Summer Programs.

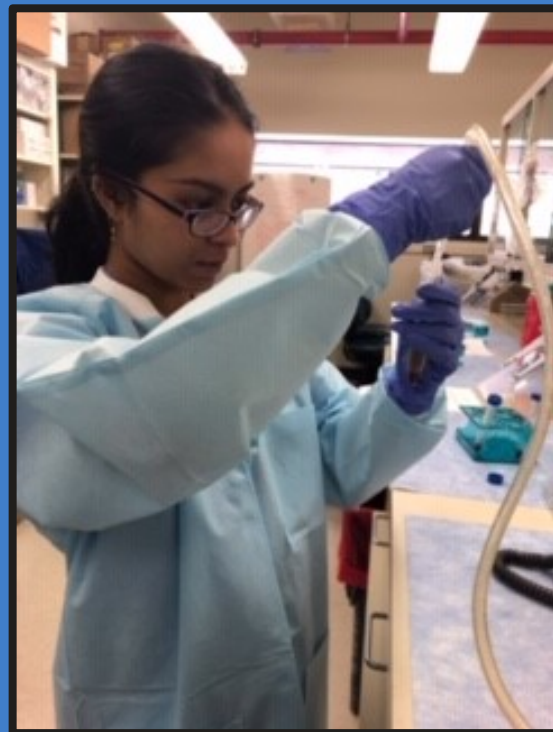

Previous laboratory and/or research experience is NOT required.

To apply for the program, students must be enrolled in their senior year at a Texas public, private or charter high school and graduate prior to the start of the program. This is a competitive program and a review committee will evaluate each application for a demonstration of academic achievement, leadership, scientific aptitude, and service to community and/or school.

Housing is not provided and is the responsibility of the participant for the duration of the program.
